

Hassan Ahmed

Data analyst

Giza, Omrania | +20 124926110 | hassan0ahmed17@gmail.com | www.linkedin.com/in/hassannahmed/

PROFESSIONAL SUMMARY

Student with a strong foundation in Python, C++, Mathematics, OOP, and Data Structures. Currently focusing on Data Analysis, Machine Learning, and Computer Vision, with hands-on experience working with data, discovering insights, and building practical projects. Passionate about applying programming, mathematics, and AI to solve real-world problems, with the goal of becoming a Computer Vision Engineer.

EDUCATION

Faculty of Computation and Information

June-2028

Helwan (capital) university

- Major: Software Engineering
- GPA: 3.7

SKILLS

Technical: Python, SQL, Power BI, Pandas, Matplotlib, Seaborn

Tools & Platforms: GitHub, Jupyter, VS Code

Languages: Arabic (Native), English (Fluent)

EXPERIENCE

Digital Egypt Pioneers Initiative (DEPI) internship:

December-2026

- Python, Pandas, NumPy
- Matplotlib and Seaborn
- Machine learning
- Deep learning

PROJECTS

Crime incident dataset cleaned: cleaned a dataset from Kaggle that was about 2000 rows, dealt with missing values, duplicates, and inconsistent entries

Netflix titles dataset cleaned: cleaned the dataset and extracted some insights about data

Retail store sales dataset: cleaned the dataset and applied some visualizations using Plotly

Match finder: used web scraping to create a web application that displays the entered date matches results

Smart City Digital Twin Ecosystem

- Processed and analyzed a large-scale smart city dataset containing **528K+ records and 80 columns**.
- Cleaned and preprocessed the data by handling missing values, duplicate records, and inconsistent data.
- Conducted exploratory data analysis (EDA) to identify patterns, relationships, and key insights across the datasets.
- Applied and evaluated multiple machine learning models to uncover predictive patterns and support data-driven insights.
- Transformed raw, complex datasets into structured and analysis-ready data for machine learning applications.

CERTIFICATIONS

- Data analysis: Udemy (2026)
- SQL: DataCamp (2026)
